## About This Game

A mysterious creature has destroyed a village located near Walden's cabin, killing every person residing on the premises. Now, Walden wants revenge. This is the story of an old hunter who has nothing to lose.

- Jump scares to chill your bones;
- Exclusive sound-design and horrifying scenarios;
- Original soundtrack produced by Igo Carminatti.

**(Played by famous youtubers such as "PewDiePie", "Markiplier" and many others)**

This game costs less than a cup of coffee and is more enjoyable.

I really like the western setup and omg the soundtrack is awesome! Most of the game however feels really unpolished and prototypey. There's a lot of potential though and I'd love to see a complete remake of this game with cheese factor turned to 11, better rendering engine, faster combat, more enemies and most importantly voice acting!
